

Ado.net assignment

Code

```
Console.WriteLine("Hello, World!");
```

```
//Establish a connection
```

```
SqlConnection conn = new SqlConnection("data source  
=PTSQLTESTDB01;database=Senthilkumar;integrated  
security=true");
```

```
conn.Open();
```

```
SqlCommand cmd = new SqlCommand("create table  
guets(guestid int primary key,guestname VARCHAR(255))",  
conn);
```

```
cmd.ExecuteNonQuery();
```

```
conn.Close();
```

```
Console.WriteLine("Table Created Successfully");
```

Code answer:
